Product Information

CD-RW Recorder CD-RW4U

The CD-RW4U is the first CD-R-/CD-RW recorder from Tascam that can be used both as an independent audio recorder and a practical CD-RW drive on a Macintosh or Windows computer. In recording studios and small radio stations, for example, it can be used for generating audio CDs directly from the mixing desk or for copying CDs from other media such as DAT, MD or CD. On the other hand, it can be used as an external CD drive on a computer for playing and recording audio or data CDs, with a single USB terminal for transferring the entire data including audio material.

The CD-RW4U offers a host of useful features which are not found in conventional CD burners. For example, it has a sample rate converter for recording digital audio sources which have different sampling frequencies than a standard CD (44.1 kHz), analogue and digital input level controls, a recording buffer which guarantees that even the first milliseconds of a track are recorded, and a convenient "multi-dial" which makes it easier to set and confirm para- meters. Audio material can be manually or automatically divided into tracks (auto track function), fade-in and fade- out over a given time interval is actuated at the touch of a button, and, last but not least, a wireless remote control facilitates easy operation of the CD-RW4U from various locations.

The CD-RW4U has asymmetric analogue inputs and outputs for connecting semi-professional audio equip- ment. 20-bit D/A and A/D converters guarantee excellent quality recording and fidelity. The system is also fitted with coaxial digital inputs and outputs for recording and play- back on suitably equipped digital audio equipment.

The CD-RW4U is the perfect synthesis for processing and storing important audio material and electronic data.

TASCAM

Main Features

- 20-bit ADC and DAC
- Applicable discs: CD-R/RW and CD-R/RW-DA
- RCA unbalanced analog I/O
- COAXIAL digital I/O
- Input source monitor
- Input level control (analog and digital)
- Sampling rate converter
- Level meter
- Elapsed and remain time display*
- Single repeat and all repeat*
- Shuffle play*
- Up to 25 songs program play*
- Selectable copy ID
- Synchronized recording
- Auto track and manual track function
- Sound level (for synchronized recording and auto track function)
- Fade in/out recording
- Rec mute function*

- Unfinalize function for CD-RW discs*
- Track erase and disc erase function for CD-RW discs*
- Disc refresh function for CD-RW*
- Stereo mini type headphone jack
- RC-RW700 wireless remote controller
- USB interface
- 4x read/write speed
- B's recorder Gold (for Windows and MacOS) and B's Clip (for Windows) bundled

* remote controller function only
