

IF-AV/DM

Aviom[®] Interface Card for DM-3200/DM-4800

The IF-AV/DM interface card for the Tascam DM-3200 and DM-4800 digital consoles allows connection to Aviom[®] audio networks over CAT-5e cable. The card sends up to 16 channels of digital audio to an A-Net[®] unit, allowing performers to mix their own monitor feed for the best performance. The DM-3200 can accommodate one IF-AV/DM (Slot 1), while up to two cards can be used in the DM-4800 (Slots 1 and 3) for a total of 32 audio channels. This card helps reduce cost, labor and time in live applications and when installing large-scale systems.

Main Features

- 16-channel audio output from DM-3200 and DM-4800 consoles to Aviom[®] A-Net[®] systems
- Up to 150 m signal transmission over CAT-5e cable interface
- 44.1 kHz or 48 kHz sample rates at 24-bit resolution
- Less than 800 μ s latency
- Stereo linking
