

Portastudio

Four-track home recording app for iPad

The Tascam Portastudio™ app brings 30 years of easy-to-use home recording to your Apple® iPad™. Based on the PORTA ONE recorder that revolutionized recording in 1984, the Portastudio app records up to four tracks with a vintage vibe.

Record one track at a time using the built-in mic or a headset microphone connection, monitoring on authentic VU meters. A cassette transport with counter tracks your position while you mix with level, pan and EQ controls. The built-in mixdown function saves your song as a WAV file with CD quality. Your mix appears in iTunes® when you're finished, ready to share with friends and bandmates.

A generation of your favorite bands crafted their songs with Portastudios, now it's your turn. Start capturing your songs with the company that invented home recording using the Portastudio app by Tascam.

Visit the Tascam Portastudio on the iTunes store.
