

## TH-06

### Bass XL Monitoring Headphones

When you need comfortable, versatile headphones with excellent audio quality and smooth, extra deep lows, reach for the Tascam TH-06. DJs, producers and remixers can rely on these headphones for producing EDM, Hip Hop, Metal, R&B and other genres that need extra punch, and they're an excellent choice for music enthusiasts who simply love deep low end.

# Details

## The Choice for Big Bass

The TH-06 employs a custom 45-mm neodymium-magnet driver and features Bass XL, a special voicing that delivers enhanced low-frequency response for superior dynamic range, while offering excellent clarity and minimal distortion. You get deep low bass that is balanced, never overpowering the rest of the audio field or sounding tubby or artificial.

## Work in Comfort Without Ear Fatigue

Tascam TH-06 headphones are lightweight and feature high-quality, circumaural, closed-back ear cups that provide listening isolation while minimising headphone bleed. The ear cups rotate 180 degrees, and a special sewing process around the edge tightly stitches them around a stainless steel frame for extra cushion. Combined with a strong, flexible, lightweight manganese headband, this ensures a comfortable fit. With their comfort, adjustability, distortion-free sound, and listening isolation, you can monitor with TH-06 headphones for extended periods without ear fatigue.

## High Quality Cables and Connections

TH-06 headphones are built to perform over the long haul, including internal connections that use oxygen-free copper (OFC) wire core. The long cable (3 metres) gives you plenty of room to move around, and it comes with both a gold-plated, 3.5-mm connector and a 6.3-mm adapter.

## Features at a glance

- Ultra-wide dynamic range with enhanced Bass XL response
  - Smooth natural bass for DJs, producers, remixers or anyone wanting expanded low end
  - Closed back, circumaural design with 180 degrees rotatable cups
