TM-AM3

Boom Microphone Stand With Counterweight

The TM-AM3 is a boom microphone stand with counterweight to provide high stability even when used with heavier mics. The counterweight can be adjusted according to the microphones weight. Unlike the similar **TM-AM1**, the TM-AM3 has a tripod design known from loudspeaker stands that provides high stability even in narrow spaces. The telescopic boom can be adjusted in a wide range, making it ideal for many applications including drums or vocal booths. The boom can also be removed when not required.

Easy to place with other stands

Boom in long position

Boom in short position

Features at a glance
