Product Information

Scratch DJ Mixers XS-8 · XS-4 · XS-3

The XS-8, XS-4 and XS-3 mixers are designed to offer affordable mixing solutions for the performance-oriented scratch DJ.

The XS-8 represents the top of the affordable DJ tool line. It is a 2-channel scratch mixer that features a fully adjustable crossfader and channel fader curves, crossfader and channel fader reverse controls, a 3-band EQ, interfacing for external effects sends and returns, discrete level controls for stereo outputs, dedicated EQ controls for the mic input and more. The XS-8 is also part of the "Super Analog Series".

The XS-4 is designed as a 2-channel battle mixer with an uncluttered, logical control surface. It offers a 2-band EQ and more sophisticated audio interfacing than the XS-3, including master outputs on balanced XLR jacks. The XS-4 offers all the features and ergonomic design desired for serious scratch DJing with the sound quality and reliability

for which TASCAM is well known. The XS-4 is the first product that is represented in Tascam's new "Super Analog Series" of DJ tools, which signifies the excellent audio quality offered by these products.

The XS-3 is an affordable two-channel mixer designed for a wide variety of DJ environments. It offers three-band EQ, a host of inputs and outputs including line and phono inputs on each each channel, balanced and unbalanced master outputs, a recording output, an effects input, a mic input, crossfader start capabilities, adjustable crossfader curve selection and a crossfader reverse control.
