# Connecting the DR-22WL/DR-44WL to the computer by Wi-Fi for the first time

Since the Wi-Fi connection between the DR-22WL/DR-44WL (hereafter, "DR unit") and the computer is direct, there is no need for a Wi-Fi router or other external equipment, nor for a Wi-Fi network.

The DR unit and the computer can be connected without anything else.

### NOTE

When the DR unit and the computer are connected by Wi-Fi, the computer cannot be connected to other Wi-Fi networks.

- Press the Wi-Fi button on the DR unit. The Wi-Fi indicator blinks. A "NEW CONNECTION?" pop-up message appears to confirm whether or not it is a new connection.
- 2. Since this is the first time connecting, press the F3 we button on a DR-22WL or the ENTER/MARK (YES) button on a DR-44WL.

3. The **SSID** and a **password** appear on the display.

NOTE

The SSID is the name of the wireless LAN access point (wireless LAN device).

 Click the wireless connection icon in the computer task bar (Windows) or menu bar (Mac) to open a list of wireless networks.
